

# Package ‘spm’

November 29, 2019

**Title** SPM extract package

**Version** 1.1

**Date** 2019-11-13

**Author** A. Dunn

**Description** A set of R functions for extracting from SPM output files.

**Maintainer** A Dunn <Alistair.Dunn@OceanEnvironmental.co.nz>

**License** CPL v1.0. See the SPM User Manual for license details.

**URL** <http://www.niwa.co.nz>

**Copyright** National Institute of Water & Atmospheric Research (NIWA), New Zealand Ministry for Primary Industries.

## R topics documented:

spm-package . . . . .	2
calc.abundance . . . . .	3
extract . . . . .	3
extract.ageingerror . . . . .	4
extract.agesize . . . . .	4
extract.ageweight . . . . .	4
extract.covariance . . . . .	5
extract.derivedquantity . . . . .	5
extract.derivedquantitybycell . . . . .	5
extract.estimatesummary . . . . .	6
extract.estimatevalue . . . . .	6
extract.initialisationphase . . . . .	6
extract.layer . . . . .	7
extract.layerderivedview . . . . .	7
extract.MCMC . . . . .	7
extract.objectivefunction . . . . .	8
extract.observation . . . . .	8
extract.partition . . . . .	8
extract.partitionbiomass . . . . .	9
extract.randomnumberseed . . . . .	9
extract.selectivity . . . . .	9
extract.simulations . . . . .	10
extract.sizeweight . . . . .	10
extract.spatialmap . . . . .	10

generate.MVU . . . . .	11
PF . . . . .	11
PFconstant . . . . .	12
PFdoublenormal . . . . .	12
PFexponential . . . . .	13
PFinverselogistic . . . . .	13
PFlogistic . . . . .	14
PFnormal . . . . .	14
PFthreshold . . . . .	15
spm.area . . . . .	15
spm.convert.to.lines . . . . .	15
spm.dplot . . . . .	16
spm.extract.simulated.observation . . . . .	16
spm.get.lines . . . . .	16
spm.is.whole.number . . . . .	17
spm.isin . . . . .	17
spm.make.filename . . . . .	17
spm.make.list . . . . .	18
spm.make.table . . . . .	18

spm-package	<i>SPM extract package</i>
-------------	----------------------------

---

## Description

A set of R functions for extracting and processing SPM output.

## Details

Package: spm  
 Date: 2013-02-12  
 License: See the SPM manual, or use 'spm -l' at the command line to view the SPM license.  
 URL: <http://www.niwa.co.nz>  
 Copyright: National Institute of Water & Atmospheric Research (NIWA).

## Index:

extract	Extract elements from an SPM output file
---------	--

spm-package                      SPM package

### Author(s)

A. Dunn

Maintainer: A Dunn <a.dunn@niwa.co.nz>

---

calc.abundance	<i>Generate a multivariate uniform distribution based on the bounds for the estimated parameters</i>
----------------	--

---

### Description

Generate a multivariate uniform distribution based on the bounds for the estimated parameters

### Usage

```
calc.abundance(data, categories = NULL, ages = NULL, total = T)
```

### Arguments

data	data representing a partition
categories	Optional subset of categories
ages	Optional subset of ages
total	If true, then sum over selected categories and ages. Default = TRUE

### Author(s)

Alistair Dunn

---

extract	<i>Extract SPM output into R</i>
---------	----------------------------------

---

### Description

Extract SPM output into R

### Usage

```
extract(file, path = "", ignore.unknown = FALSE)
```

### Arguments

file	the name of the input file containing model output to extract
path	Optionally, the path to the file
ignore.unknown	Ignore unknown objects in the output file

### Author(s)

Alistair Dunn

---

extract.ageingerror	<i>Utility extract function</i>
---------------------	---------------------------------

---

**Description**

Utility extract function

**Usage**

```
extract.ageingerror(lines)
```

**Author(s)**

Alistair Dunn

---

---

extract.agesize	<i>Utility extract function</i>
-----------------	---------------------------------

---

**Description**

Utility extract function

**Usage**

```
extract.agesize(lines)
```

**Author(s)**

Alistair Dunn

---

---

extract.ageweight	<i>Utility extract function</i>
-------------------	---------------------------------

---

**Description**

Utility extract function

**Usage**

```
extract.ageweight(lines)
```

**Author(s)**

Alistair Dunn

---

extract.covariance	<i>Utility extract function</i>
--------------------	---------------------------------

---

**Description**

Utility extract function

**Usage**

```
extract.covariance(lines)
```

**Author(s)**

Alistair Dunn

---

extract.derivedquantity	<i>Utility extract function</i>
-------------------------	---------------------------------

---

**Description**

Utility extract function

**Usage**

```
extract.derivedquantity(lines)
```

**Author(s)**

Alistair Dunn

---

extract.derivedquantitybycell	<i>Utility extract function</i>
-------------------------------	---------------------------------

---

**Description**

Utility extract function

**Usage**

```
extract.derivedquantitybycell(lines)
```

**Author(s)**

Alistair Dunn

---

```
extract.estimatesummary
```

*Utility extract function*

---

**Description**

Utility extract function

**Usage**

```
extract.estimatesummary(lines)
```

**Author(s)**

Alistair Dunn

---

```
extract.estimatevalue
```

*Utility extract function*

---

**Description**

Utility extract function

**Usage**

```
extract.estimatevalue(lines)
```

**Author(s)**

Alistair Dunn

---

```
extract.initialisationphase
```

*Utility extract function*

---

**Description**

Utility extract function

**Usage**

```
extract.initialisationphase(lines)
```

**Arguments**

lines                    a file of scanned lines

**Author(s)**

Alistair Dunn

---

extract.layer	<i>Utility extract function</i>
---------------	---------------------------------

---

**Description**

Utility extract function

**Usage**

```
extract.layer(lines)
```

**Author(s)**

Alistair Dunn

---

extract.layerderivedview	<i>Utility extract function</i>
--------------------------	---------------------------------

---

**Description**

Utility extract function

**Usage**

```
extract.layerderivedview(lines)
```

**Author(s)**

Alistair Dunn

---

extract.MCMC	<i>Utility extract function</i>
--------------	---------------------------------

---

**Description**

Utility extract function

**Usage**

```
extract.MCMC(lines)
```

**Author(s)**

Alistair Dunn

---

extract.objectivefunction  
*Utility extract function*

---

**Description**

Utility extract function

**Usage**

extract.objectivefunction(lines)

**Author(s)**

Alistair Dunn

---

extract.observation      *Utility extract function*

---

**Description**

Utility extract function

**Usage**

extract.observation(lines)

**Author(s)**

Alistair Dunn

---

extract.partition      *Utility extract function*

---

**Description**

Utility extract function

**Usage**

extract.partition(lines)

**Author(s)**

Alistair Dunn

---

extract.partitionbiomass  
*Utility extract function*

---

**Description**

Utility extract function

**Usage**

extract.partitionbiomass(lines)

**Author(s)**

Alistair Dunn

---

extract.randomnumberseed  
*Utility extract function*

---

**Description**

Utility extract function

**Usage**

extract.randomnumberseed(lines)

**Author(s)**

Alistair Dunn

---

extract.selectivity     *Utility extract function*

---

**Description**

Utility extract function

**Usage**

extract.selectivity(lines)

**Author(s)**

Alistair Dunn

---

extract.simulations	<i>Utility extract function</i>
---------------------	---------------------------------

---

**Description**

Utility extract function

**Usage**

```
extract.simulations(file, path = "")
```

**Author(s)**

Alistair Dunn

---

extract.sizeweight	<i>Utility extract function</i>
--------------------	---------------------------------

---

**Description**

Utility extract function

**Usage**

```
extract.sizeweight(lines)
```

**Author(s)**

Alistair Dunn

---

extract.spatialmap	<i>Utility extract function</i>
--------------------	---------------------------------

---

**Description**

Utility extract function

**Usage**

```
extract.spatialmap(lines)
```

**Author(s)**

Alistair Dunn

---

generate.MVU	<i>Generate a multivariate uniform distribution based on the bounds for the estimated parameters</i>
--------------	--

---

**Description**

Generate a multivariate uniform distribution based on the bounds for the estimated parameters

**Usage**

```
generate.MVU(file, path = "", output.file, sample.size = 1)
```

**Arguments**

file	the name of the input file containing the estimated fits
path	Optionally, the path to the file
output.file	The name of the output file to write randomly generated values
sample.size	The number f samples to generate

**Author(s)**

Sophie Mormede

---

PF	<i>Evaluate a preference function</i>
----	---------------------------------------

---

**Description**

Evaluate a preference function

**Usage**

```
PF(type = "none", x, alpha, ..., rescale = T)
```

**Arguments**

type	A type of preference function. Valid values include "constant", "doublenormal", "exponential", "inverselogistic", "logistic", "normal", and "threshold"
x	x-values over which to evaluate. Default = 1
alpha	The value of the alpha parameter. Default = 1
...	the parameters of the preference functions
rescale	Rescale the function to have value 1. Default = TRUE

**Author(s)**

Alistair Dunn

---

PFconstant	<i>Evaluate the constant preference function</i>
------------	--

---

**Description**

Evaluate the constant preference function

**Usage**

```
PFconstant(x, alpha, rescale = T)
```

**Arguments**

x	x-values over which to evaluate. Default = 1
alpha	The value of the alpha parameter. Default = 1
rescale	Rescale the function to have value 1?. Default = TRUE

**Author(s)**

Alistair Dunn

---

PFdoublenormal	<i>Evaluate the double normal preference function</i>
----------------	---

---

**Description**

Evaluate the double normal preference function

**Usage**

```
PFdoublenormal(x, alpha, mu, sigmaL, sigmaR, rescale = T)
```

**Arguments**

x	x-values over which to evaluate. Default = 1
alpha	The value of the alpha parameter. Default = 1
mu	the mean of the double normal
sigmaL	the standard deviation of the left-hand side of the double normal
sigmaR	the standard deviation of the right-hand side of the double normal
rescale	Rescale the function to have value 1?. Default = TRUE

**Author(s)**

Alistair Dunn

---

PFexponential	<i>Evaluate the exponential preference function</i>
---------------	---

---

**Description**

Evaluate the exponential preference function

**Usage**

```
PFexponential(x, alpha, lambda, rescale = T)
```

**Arguments**

x	x-values over which to evaluate. Default = 1
alpha	The value of the alpha parameter. Default = 1
lambda	the rate of the exponential
rescale	Rescale the function to have value 1?. Default = TRUE

**Author(s)**

Alistair Dunn

---

PFinverselogistic	<i>Evaluate the inverse-logistic preference function</i>
-------------------	--

---

**Description**

Evaluate the inverse-logistic preference function

**Usage**

```
PFinverselogistic(x, alpha, a50, ato95, rescale = T)
```

**Arguments**

x	x-values over which to evaluate. Default = 1
alpha	The value of the alpha parameter. Default = 1
a50	the a50 value of the inverse logisitic
ato95	the ato95 value of the inverse logisitic
rescale	Rescale the function to have value 1?. Default = TRUE

**Author(s)**

Alistair Dunn

---

PFlogistic	<i>Evaluate the logistic preference function</i>
------------	--

---

**Description**

Evaluate the logistic preference function

**Usage**

```
PFlogistic(x, alpha, a50, ato95, rescale = T)
```

**Arguments**

x	x-values over which to evaluate. Default = 1
alpha	The value of the alpha parameter. Default = 1
a50	the a50 value of the logisitic
ato95	the ato95 value of the logisitic
rescale	Rescale the function to have value 1?. Default = TRUE

**Author(s)**

Alistair Dunn

---

PFnormal	<i>Evaluate the normal preference function</i>
----------	--

---

**Description**

Evaluate the normal preference function

**Usage**

```
PFnormal(x, alpha, mu, sigma, rescale = T)
```

**Arguments**

x	x-values over which to evaluate. Default = 1
alpha	The value of the alpha parameter. Default = 1
mu	the mean of the normal
sigma	the standard deviation of the normal
rescale	Rescale the function to have value 1?. Default = TRUE

**Author(s)**

Alistair Dunn

---

PFthreshold	<i>Evaluate the threshold preference function</i>
-------------	---

---

**Description**

Evaluate the threshold preference function

**Usage**

```
PFthreshold(x, alpha, N, lambda, rescale = T)
```

**Arguments**

x	x-values over which to evaluate. Default = 1
alpha	The value of the alpha parameter. Default = 1
N	the threshold value
rescale	Rescale the function to have value 1?. Default = TRUE

**Author(s)**

Alistair Dunn

---

spm.area	<i>utility function</i>
----------	-------------------------

---

**Description**

utility function

**Usage**

```
spm.area(corners)
```

**Author(s)**

Alistair Dunn

---

spm.convert.to.lines	<i>utility function</i>
----------------------	-------------------------

---

**Description**

utility function

**Usage**

```
spm.convert.to.lines(filename)
```

**Author(s)**

Alistair Dunn

---

spm.dplot	<i>utility function</i>
-----------	-------------------------

---

**Description**

utility function

**Usage**

```
spm.dplot(..., name = T, quantiles = c(0.5), plot.mean = F,  
  main = "", xlab = "", ylab = "", ylim, srtx = 0, bw = "nrd0",  
  adjust = 1/3, adj = 0, fill = F, gap = 0.2)
```

**Author(s)**

Alistair Dunn

---

spm.extract.simulated.observation	<i>utility function</i>
-----------------------------------	-------------------------

---

**Description**

utility function

**Usage**

```
spm.extract.simulated.observation(lines)
```

**Author(s)**

Alistair Dunn

---

spm.get.lines	<i>utility function</i>
---------------	-------------------------

---

**Description**

utility function

**Usage**

```
spm.get.lines(lines, from = -1, to = -1, contains = "",  
  starts.with = "", clip.to = "", clip.from = "",  
  clip.to.match = "", clip.from.match = "", ...)
```

**Author(s)**

Alistair Dunn

---

spm.is.whole.number	<i>utility function</i>
---------------------	-------------------------

---

**Description**

utility function

**Usage**

```
spm.is.whole.number(string)
```

**Author(s)**

Alistair Dunn

---

spm.isin	<i>utility function</i>
----------	-------------------------

---

**Description**

utility function

**Usage**

```
spm.isin(x, y)
```

**Author(s)**

Alistair Dunn

---

spm.make.filename	<i>utility function</i>
-------------------	-------------------------

---

**Description**

utility function

**Usage**

```
spm.make.filename(file, path = "")
```

**Author(s)**

Alistair Dunn

---

spm.make.list	<i>utility function</i>
---------------	-------------------------

---

**Description**

utility function

**Usage**

```
spm.make.list(lines)
```

**Author(s)**

Alistair Dunn

---

spm.make.table	<i>utility function</i>
----------------	-------------------------

---

**Description**

utility function

**Usage**

```
spm.make.table(lines)
```

**Author(s)**

Alistair Dunn

---

spm.pos	<i>utility function</i>
---------	-------------------------

---

**Description**

utility function

**Usage**

```
spm.pos(vector, x)
```

**Author(s)**

Alistair Dunn

---

spm.pos.match	<i>utility function</i>
---------------	-------------------------

---

**Description**

utility function

**Usage**

```
spm.pos.match(vector, regexp)
```

**Author(s)**

Alistair Dunn

---

spm.recodevector	<i>utility function</i>
------------------	-------------------------

---

**Description**

utility function

**Usage**

```
spm.recodevector(in.data, from.vals, to.vals)
```

**Author(s)**

Alistair Dunn

---

spm.remove.first.words	<i>utility function</i>
------------------------	-------------------------

---

**Description**

utility function

**Usage**

```
spm.remove.first.words(string, words = 1)
```

**Author(s)**

Alistair Dunn

---

`spm.remove.last.words` *utility function*

---

**Description**

utility function

**Usage**

```
spm.remove.last.words(string, words = 1)
```

**Author(s)**

Alistair Dunn

---

`spm.report.types` *utility function*

---

**Description**

utility function

**Usage**

```
spm.report.types()
```

**Author(s)**

Alistair Dunn

---

`spm.string.to.vector.of.numbers`  
*utility function*

---

**Description**

utility function

**Usage**

```
spm.string.to.vector.of.numbers(string, sep = " ")
```

**Author(s)**

Alistair Dunn

---

spm.string.to.vector.of.words  
*utility function*

---

**Description**

utility function

**Usage**

```
spm.string.to.vector.of.words(string, sep = " ")
```

**Author(s)**

Alistair Dunn

---

spm.unpaste                      *utility function*

---

**Description**

utility function

**Usage**

```
spm.unpaste(string, sep = " ")
```

**Author(s)**

Alistair Dunn

---

spm.zeroFun                      *utility function*

---

**Description**

utility function

**Usage**

```
spm.zeroFun(x, delta = 1e-11)
```

**Author(s)**

Alistair Dunn
